Job Description: 3D Animation Artist

We are seeking a 3D Animator – an enthusiastic, flexible, creative talent to complement an industry leading team in their quest to create the animations. You will work on both original IP and licensed content – across all aspects of animation. Blending artistic expertise and technical ability, you will create visually stimulating content that will enhance and showcase original experiences to a wide audience. This position will use their talents to constructively communicate and create content with a motivated cross disciplined team, participate and grow in a collaborative environment, and help shape the industry with their innovative creations.

Desired Candidate Profile

- Design and create engaging 3D animation.
- Produce character and object animations – excellent understanding of weight, silhouette, staging, anticipation, timing, follow through, arcs, etc.
- Produce work across a broad range of subjects and styles from realistic motion to more cartoony and whimsical....and everything in-between.

Additional are always pluses (generalist abilities)

Needs to be

- Outstanding traditional art and animation skills – Bachelor’s degree required or equivalent experience.
- 2-4 years of experience creating awesome 3D art and animation.
- Strong knowledge and understanding of human anatomy and motion.
- Thorough understanding of the technical aspects of animation.
- Advanced experience with Photoshop, AfterEffects, and Zbrush is a plus.
- Must be organized, goal and detail oriented. Strong communication and problem solving skills.
- Must be collaborative - with the ability to take direction and to play well with others.
